

THE UNIVERSITY OF TEXAS AT AUSTIN
STEVE HICKS SCHOOL OF SOCIAL WORK

Course Number:	SW393 R1	Instructor:	Mercedes Hernandez, Ph.D., LCSW
Unique Number:	61350	E-mail:	mercedeh@utexas.edu
Semester:	Spring 2021	Telephone:	(512) 471-8189
Meeting Time:	Tuesdays 11:30am – 2:30pm	Office:	3.106F
and Place:	Web-based (Zoom)	Office Hours:	Before or after class & by appointment

CLINICAL ASSESSMENT AND DIFFERENTIAL DIAGNOSIS

I. STANDARDIZED COURSE DESCRIPTION

This course will focus on the incidence, etiology, and assessment of health and mental health issues with children, adolescents, adults, and families. The framework of the course is based on social work values and the ethical decision-making process, as illuminated by the NASW Code of Ethics. Students will learn models of assessment with which to evaluate human functioning throughout the lifecycle. A bio-psycho-social-spiritual and cultural emphasis will be applied to the diagnostic categories within the most current version of the Diagnostic and Statistical Manual of Mental Disorders. Students will develop an advanced understanding of people from diverse backgrounds—affirming and respecting their strengths and differences. The course is built on the identification, analysis, and implementation of empirically based assessment tools that have incorporated statistically valid reliability and validity studies. Major classification systems, such as the Diagnostic and Statistical Manual of Mental Disorders and the International Classification of Diseases, and other schemes for assessing and understanding human behavior, will be covered.

II. STANDARDIZED COURSE OBJECTIVES

The Clinical Assessment and Differential Diagnosis course (SW 393R 1) will:

Objective # Objectives

- 1 Demonstrate an in-depth understanding of biological, psychosocial, and cultural theories on the etiology of mental health and mental illness;
- 2 Demonstrate the ability to apply methods of empirically based assessment tools and techniques, including those developed through classificatory schemes, standardized measures, and qualitative typologies;
- 3 Demonstrate an advanced clinical knowledge of the relationship between assessment and intervention as it relates to the strengths, capacities and resources of individuals and families;

- 4 Demonstrate the ability to adapt assessment models to reflect an understanding of persons from diverse backgrounds, including (but not limited to) race, ethnicity, culture, class, gender, sexual orientation, religion, physical or mental ability, age, and national origin;
- 5 Critically evaluate and analyze different theoretical and assessment models as to their efficacy in given situations. This includes a) the adequacy of the research and knowledge base; b) the range of applicability; c) the value and ethical issues, including the student's own value system, and d) the policy implications involved in assessment and delivery of services;
- 6 Demonstrate an understanding of the limitations in using classification schemes in understanding human behavior and the danger of mislabeling people, particularly those from at-risk populations. Demonstrate advanced knowledge of social work values and the ethical decision-making processes as they relate to ethical dilemmas in clinical assessment and practice.

III. TEACHING METHODS

Class format is both didactic and interactive. Case vignettes, video clips and semi-structured class exercises will accompany lectures, readings, and assignments with emphasis on issues of diversity and its impact on assessment. The combination of these approaches will highlight the process of assessment and differential diagnostic skills.

IV. REQUIRED TEXT AND MATERIALS

American Psychiatric Association. (2013). *Diagnostic and statistical manual of mental disorders-5*. Washington, DC: Author.

DSM-5 full version is available through the UT library at <https://ebookcentral-proquest-com.ezproxy.lib.utexas.edu:2444/lib/utxa/detail.action?docID=1811753&query=dsm+5+>

(Pocket version is not acceptable as a substitute for the DSM-5, as the full version contains much more necessary information.)

Note: DSM-5 Updates available at <https://www.psychiatry.org/psychiatrists/practice/dsm/updates-to-dsm-5>

Required Online Readings: All additional readings are available on Canvas.

Recommended

Black, D. W. & Andreason, N. C. (2014). *Introductory textbook of psychiatry* (6th ed.). Washington, DC: American Psychiatric Publishing, Inc.

Introductory textbook of psychiatry is available through the UT library at <https://www-r2library-com.ezproxy.lib.utexas.edu/resource/title/1585624705>

Morrison, J. (2014). *The DSM-5 made easy: The clinicians guide to diagnosis*. New York, NY: Guilford Press.

The DSM-5 made easy is available through the UT library at <https://ebookcentral-proquest-com.ezproxy.lib.utexas.edu/lib/utxa/reader.action?docID=1682559>

V. COURSE REQUIREMENTS

The grade for the course will be based on your ability to demonstrate knowledge and apply assessment skills presented in class including differential diagnosis. Class attendance, participation, and promptness in completing assignments are considered when assigning the grade. This is a professional practice class, and each student is expected to demonstrate behavior that meets the criteria of the National Association of Social Workers code of ethics and meets the standards for professional practice of social work.

VI. GRADES

Class grades will be based on the following scale:

94.0 and Above	A
90.0 to 93.999	A-
87.0 to 89.999	B+
84.0 to 86.999	B
80.0 to 83.999	B-
77.0 to 79.999	C+
74.0 to 76.999	C
70.0 to 73.999	C-
67.0 to 69.999	D+
64.0 to 66.999	D
60.0 to 63.999	D-
Below 60.0	F

VII. CLASS POLICIES

1. You are expected to read the assigned readings (some students use study groups), attend each class meeting, remain in class for the duration of the session, contribute to class discussions, and participate in skill-building exercises. Failure to attend class regularly (missing more than two class sessions) may result in a lower grade for the course, at the instructor's discretion. As soon as you know that you will not be able to attend class, you should e-mail or call the instructor.
2. You should expect to spend an additional three hours (for each hour of class or lecture per week) of your own time in course-related activities, including reading required materials, completing assignments, preparing for assignments or exams, reviewing online content, etc.
3. You are encouraged to fully participate in class, especially if you do not understand the material. This course should be a fully interactive one. No question will be regarded as insignificant by the instructor. However, the instructor will reserve the prerogative of asking students to meet separately if discussion or questioning is so extensive that it infringes on the topics that other students need to have covered. The classroom should be an open forum for the liberal exchange of differences of opinion and for discussion of these different perspectives, and for promoting understanding.
4. No late assignments will be accepted except in extreme emergencies and then only with permission of the instructor. If you are in an emergency situation you should contact the instructor and negotiate a new due date. All late assignments will be assessed point penalties at a rate of 5 points a day.

5. You should be especially careful not to contribute unwittingly to myths about mental illness and disability in the conduct of practice, research, interpretation of data, and use of terms. The integrity of persons being addressed should be maintained by avoiding language that pathologizes or equates persons with the conditions they have (such as “a schizophrenic,” “a borderline,” “addicts,” “epileptics,” or “the disabled”) or language that implies that the person as a whole is disordered or disabled, as in the expression “chronics,” “psychotics,” or “disabled persons.” Terms are preferred that preserve the integrity of the person, as in “persons [or people] with disabilities,” “a person diagnosed with schizophrenia.” Terms conveying negative overtones should be replaced with more neutral expressions. For example, instead of “confined to a wheelchair,” state “uses a wheelchair.”

VIII. COURSE ASSIGNMENTS

Assignment 1: Article Assessment (15% of Final Grade)

You will select one of three articles found on Canvas and write a short answer paper (4-5 pages) addressing the DSM-5 and considerations for practice for social workers. A detailed guideline for the article assessment will be provided.

Assignment 2: Case Study Summaries (10% of Final Grade)

Each week we will work on a case study in class. Working with your group, you will provide a detailed response to questions related to the case study and submit your responses after class. We will have an opportunity to go over the case study and questions in class.

Assignment 3: Video Case Study Summaries (5% of Final Grade)

To facilitate learning of key diagnostic criteria and assessment, you will watch clinical assessment videos of various diagnoses covered in class and answer questions using Canvas. A detailed guideline will be provided.

Exams (30% Each; 60% of Final Grade)

There will be two take-home exams. The first exam will be due at midterm consisting of case studies. The second exam, due at the end of the semester, is comprehensive and will be similar in format to the first exam.

Class Participation (10% of Final Grade)

Class participation grade includes attendance, punctuality, and informed class discussion. Your contribution to the success of this course is important. Hence, students are expected to actively contribute to the class discussions and learning in and outside of the classroom.

Note: Any information contained in this course outline (including, topics, readings, assignments, and dates) is subject to change as deemed necessary by the instructor.

X. UNIVERSITY POLICIES

COVID-19 RELATED INFORMATION. The University’s policies and practices related to the pandemic may be accessed at: <https://protect.utexas.edu/>

THE UNIVERSITY OF TEXAS HONOR CODE. The core values of The University of Texas at Austin are learning, discovery, freedom, leadership, individual opportunity, and responsibility. Each member of the university is expected to uphold these values through integrity, honesty, trust, fairness, and respect toward peers and community.

DOCUMENTED DISABILITY STATEMENT. Any student who requires special accommodations must obtain a letter that documents the disability from the Services for Students with Disabilities area of the Division of Diversity and Community Engagement (471- 6259 voice or 471-4641 TTY for users who are deaf or hard of hearing). A student should present the letter to the professor at the beginning of the semester so that needed accommodations can be discussed and followed. The student should remind the professor of any testing accommodations no later than five business days before an exam. For more information, visit: <http://diversity.utexas.edu/disability/>.

PROFESSIONAL CONDUCT AND CIVILITY IN THE CLASSROOM. The professor expects students to act as professionals in class. This means students should arrive on time for class, be prepared to participate in the class discussion, and show respect for one another’s opinions. A course brings together a group of diverse individuals with various backgrounds. Students are influenced and shaped by such factors as race, ethnicity, gender, sex, physical abilities, religious and political beliefs, national origins, and sexual orientations, among others. We expect to learn from each other in an atmosphere of positive engagement and mutual respect. This atmosphere includes working intentionally to recognize and dismantle racism, sexism, heterosexism, and ableism in the classroom. Social Work also deals with complex and controversial issues. These issues may be challenging and uncomfortable, and it would be impossible to offer a substantive classroom experience that did not include potentially difficult conversations relating to challenging issues. In this environment, we will be exposed to diverse ideas and

opinions, and sometimes we will not agree with the ideas expressed by others. Nevertheless, the professor requires that students engage one another with civility, respect, and professionalism.

UNANTICIPATED DISTRESS. Students may experience unexpected and/or distressing reactions to course readings, videos, conversations, and assignments. If so, students are encouraged to inform the professor. The professor can be responsive and supportive regarding students' participation in course assignments and activities, but students are responsible for communicating clearly what kind of support is desired. If counseling is needed, students may contact a service provider of their choosing, including the UT Counseling Center at 512-471-3515 or online at <https://cmhc.utexas.edu/>.

POLICY ON SOCIAL MEDIA AND PROFESSIONAL COMMUNICATION. Public social networks are not private. Even when open only to approved or invited members, users cannot be certain that privacy will exist among the general membership of sites. If social work students choose to participate in such forums, please assume that anything posted can be seen, read, and critiqued. What is said, posted, linked to, commented on, uploaded, subscribed to, etc., can be accessed and archived, posing potential harm to professional reputations and prospective careers.

Social work students who use social media (e.g., Facebook, Twitter, Instagram) and other forms of electronic communication (e.g., blogs) must be mindful of how their communication may be perceived by clients, colleagues, faculty, and others. Social work students are expected to make every effort to minimize material which could be considered inappropriate for a professional social worker in training. Because of this, social work students are advised to manage security settings at their most private levels and avoid posting information/photos or using any language that could jeopardize their professional image.

Students are asked to consider the amount of personal information posted on these sites and are obliged to block any client access to involvement in the students' social networks. Client material should not be referred to in any form of electronic media, including *any* information that might lead to the identification of a client or compromise client confidentiality in *any* way. Additionally, students must critically evaluate any material that is posted regarding community agencies and professional relationships, as certain material could violate the standards set by the School of Social Work, the Texas Code of Conduct for Social Workers, and/or the NASW Code of Ethics.

Social work students should consider that they will be representing professional social work practice as well as The University of Texas at Austin School of Social Work program while in the classroom, the university community, and the broader area communities.

POLICY ON SCHOLASTIC DISHONESTY. Students who violate University rules on scholastic dishonesty are subject to disciplinary penalties, including the possibility of failure in the course and/or dismissal from the University. Since such dishonesty harms the individual, all students, and the integrity of the University, policies on scholastic dishonesty will be strictly enforced. For further information, the student may refer to the Web Site of the Student Judicial Services, Office of the Dean of Students: <https://deanofstudents.utexas.edu/conduct/academicintegrity.php>.

USE OF COURSE MATERIALS. The materials used in this course, including, but not limited to exams, quizzes, and homework assignments, are copyright protected works. Any unauthorized duplication of the course materials is a violation of federal law and may result in disciplinary action being taken against the student. Additionally, the sharing of course materials without the specific, express approval of the professor may be a violation of the University's Student Honor Code and an act of academic dishonesty, which could result in further disciplinary action. This sharing includes, among other things, uploading

class materials to websites for the purpose of distributing those materials to other current or future students.

CLASSROOM CONFIDENTIALITY. Information shared in class about agencies, clients, and personal matters is considered confidential per the NASW Code of Ethics on educational supervision and is protected by regulations of the Family Educational Rights and Privacy Act (FERPA) as well. As such, sharing this information with individuals outside of the educational context is not permitted. Violations of confidentiality could result in actions taken according to the policies and procedure for review of academic performance located in sections 3.0, 3.1, and 3.2 of the Standards for Social Work Education.

USE OF E-MAIL FOR OFFICIAL CORRESPONDENCE TO STUDENTS. Email is recognized as an official mode of university correspondence; therefore, students are responsible for reading their email for university and course-related information and announcements. Students are responsible for keeping the university informed about a change of e-mail address. Students should check their e-mail regularly and frequently—daily, but at minimum twice a week—to stay current with university-related communications, some of which may be time-sensitive. Students can find UT Austin’s policies and instructions for updating their e-mail address at <https://it.utexas.edu/policies/university-electronic-mail-student-notification-policy>.

RELIGIOUS HOLIDAYS. By UT Austin policy, students must notify the professor of a pending absence at least fourteen days prior to the date of observance of a religious holy day. If the student must miss a class, examination, work assignment, or project in order to observe a religious holy day, the professor will give the student an opportunity to complete the missed work within a reasonable time after the absence.

TITLE IX REPORTING. In accordance with Title IX of the Education Amendments of 1972, the University of Texas at Austin is committed to maintaining a learning environment that is free from discriminatory conduct on the basis of sex <https://titleix.utexas.edu/>. Faculty, field instructors, staff, and/or teaching assistants in their supervisory roles are mandated reporters of incidents of sex discrimination, sexual harassment, sexual violence, stalking, dating violence, or any other forms of sexual misconduct. Students who report such incidents will be informed of University resources. Incidents will be reported to the University’s Title IX Coordinator. Further information, including student resources related to Title IX, may also be found at <https://titleix.utexas.edu/>.

CAMPUS CARRY POLICY. The University’s policy on concealed firearms may be found here: <https://campuscarry.utexas.edu>. You also may find this information by accessing the Quick Links menu on the School’s website.

SAFETY. As part of professional social work education, students may have assignments that involve working in agency settings and/or the community. As such, these assignments may present some risks. Sound choices and caution may lower risks inherent to the profession. It is the student's responsibility to be aware of and adhere to policies and practices related to agency and/or community safety. Students should notify the professor regarding any safety concerns.

BEHAVIOR CONCERNS ADVICE LINE (BCAL). If students have concerns about their behavioral health, or if they are concerned about the behavioral health of someone else, students may use the Behavior Concerns Advice Line to discuss by phone their concerns. This service is provided through a partnership between the Office of the Dean of Students, the Counseling and Mental Health Center (CMHC), the Employee Assistance Program (EAP), and The University of Texas Police Department (UTPD). Call 512-232-5050 or visit <https://safety.utexas.edu/behavior-concerns-advice-line>.

EMERGENCY EVACUATION POLICY. Occupants of buildings on the UT Austin campus are required to evacuate and assemble outside when a fire alarm is activated, or an announcement is made. Please be aware of the following policies regarding evacuation:

- Familiarize yourself with all exit doors in the classroom and the building. Remember that the nearest exit door may not be the one you used when entering the building.
- If you require assistance to evacuate, inform the professor in writing during the first week of class.
- In the event of an evacuation, follow the professor's instructions.
- Do not re-enter a building unless you are given instructions by the Austin Fire Department, the UT Austin Police Department, or the Fire Prevention Services office.
